

Amazon_Marketplace_Analytics_Project — BRD (Dashboard-aligned)

Owner: Business Analyst (Jamie Christian) | Date: January 27, 2026

Business Context

This project is intentionally aligned to the uploaded dashboard file in /Dashboard. KPI names and field terminology match the dashboard model.

Problem statement: Decision-making was slowed by inconsistent definitions and manual reporting. Stakeholders required a single source of truth dashboard with standardized KPIs and drilldowns.

Stakeholders

Name	Role	Decision Rights	Primary KPI Focus
Kara Bennett	GM (Sponsor)	Approve growth & margin actions	GMV / Take Rate % / Marketplace Revenue
Mei Tan	Performance Marketing	Own paid efficiency	AOV / Orders / GMV
Luis Ortega	Finance Analyst	Validate margin math	Marketplace Revenue / Take Rate %

KPIs (Dashboard terminology)

- GMV
- Orders
- Units Sold
- AOV
- Take Rate %
- Marketplace Revenue
- Year
- YearMonth

Scope

In-scope: KPI definitions, dataset design, refresh rules, dashboard requirements, governance artifacts (stakeholders/RAID/traceability), and executive communication.

Out-of-scope: platform replacements, contract negotiations, or upstream system re-architecture.
