

Regional_Sales_Performance_Project — BRD (Dashboard-aligned)

Owner: Business Analyst (Jamie Christian) | Date: January 27, 2026

Business Context

This project is intentionally aligned to the uploaded dashboard file in /Dashboard. KPI names and field terminology match the dashboard model.

Problem statement: Decision-making was slowed by inconsistent definitions and manual reporting. Stakeholders required a single source of truth dashboard with standardized KPIs and drilldowns.

Stakeholders

Name	Role	Decision Rights	Primary KPI Focus
Carmen Blake	VP Sales	Territory decisions	Sales by Zone/City
Devon Holt	Sales Ops	Metric definitions	Sales rollups / Zone comparisons
Mina Shah	Regional Manager	Coaching priorities	Restaurant performance variance

KPIs (Dashboard terminology)

- Restaurant ID
- City
- Zone
- Month
- Sales

Scope

In-scope: KPI definitions, dataset design, refresh rules, dashboard requirements, governance artifacts (stakeholders/RAID/traceability), and executive communication.

Out-of-scope: platform replacements, contract negotiations, or upstream system re-architecture.
