

FPnA_Executive_Analytics_Project — Requirements Traceability Narrative

This document explains how business needs connect to requirements, data, and dashboard delivery.

Traceability Flow

1. Business Problem identified with leadership
2. Business requirements documented in BRD
3. Functional definitions captured in FRD
4. User stories defined with acceptance criteria
5. Dataset designed to support each KPI
6. SQL used to validate calculations
7. Excel workbook validates logic and supports scenarios
8. Dashboard delivers final insight layer
9. Executive deck communicates decisions and impact

Why Traceability Matters

- Prevents metric drift across teams
- Improves stakeholder trust in reporting
- Ensures auditability of decisions
- Supports long-term governance of analytics assets
